

Restorative systems and tools

When asked which types of systems and tools they use to enhance their restorative services, our respondents indicate:

- 30% use a pressable ceramic system
- 20% use a digital camera/photography
- 13% use a CAD/CAM system
- 10% use a flexible partial system
- 9% use a digital shade-taking device
- 7% use a laser welder
- 3% use an electroforming system
